Dubai, United Arab Emirates | +971 569768847 | subairhidha@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI and ML graduate (Integrated M.Sc., July 2026). I build Python models from data to a working application. My projects cover hand gesture control, skin lesion classification, bank fraud detection, and a Django website. I am looking for a graduate or junior role in software or AI/ML in the UK.

TECHNICAL SKILLS

Languages	Python, SQL, HTML, CSS
ML / DL	TensorFlow, Keras, Scikit-learn, Computer Vision, MediaPipe
Data Analysis	Pandas, NumPy, Matplotlib
Web / Backend	Django, SQLite
Tools & Env	Git, GitHub, Jupyter Notebook, Google Colab, OpenCV, Tkinter, LaTeX

PROJECTS

Intelligent Gesture Controlled Virtual Interface and System *Python, Computer Vision, MediaPipe, Machine Learning*
github.com/Hidha09/gesture

- Built a webcam system that reads 8 hand gestures in real time using MediaPipe hand landmarks and a Keras neural network
- Collected about 1,600 samples from both hands and trained the model with a held-out 20% test split Fixed uneven data by collecting more samples for four gestures that had only 50 each
- Added rules to resolve gesture mix-ups, including open palm vs three fingers and left-hand vs right-hand recognition
- Implemented a 0.6 second hold and a 1.5 second cooldown to reduce false triggers
- Controls VLC through python-vlc, and other applications through PyAutoGUI key presses Runs on CPU at about 20 frames per second

Skin Cancer Detection System *Python, Machine Learning, Computer Vision, Deep Learning*

- Trained and compared VGG16, ResNet50, and CapsNet models on the HAM10000 dermoscopic image dataset
- VGG16 achieved the best performance with 89.02% test accuracy

Bank Transaction Fraud Detection (Case Study) *Python, Pandas, Scikit-learn*

- Compared Decision Tree, Random Forest, Logistic Regression, KNN, and SVM models on a Kaggle bank fraud dataset
- Random Forest achieved the best results with 97.39% accuracy, 100% precision, 94.74% recall, and 97.30% F1-score
- Performed data cleaning, outlier removal, and feature selection before model training

Class Management System *Python, Django, HTML, CSS, Bootstrap, SQLite*

- Built a Django-based class management website with a teammate for handling assignments, marks, and notices
- Contributed to testing, frontend-backend integration, class management features, and page styling

EDUCATION

Integrated M.Sc. in Computer Science — Artificial Intelligence & Machine Learning *July 2026*
Nehru Arts and Science College, Kanhangad, Kerala GPA: 7.717 / 10

Relevant Coursework: Machine Learning · Deep Learning · Data Structures & Algorithms · Database Management Systems · Web Technologies

CERTIFICATIONS
